SUMMARY

Full-stack software engineer with 6+ years shipping production web applications, from UI implementation through API and data-layer design. Strong React and TypeScript/Node.js foundation, hands-on experience building AI-powered features (Google Vertex AI), and a track record of maintaining code quality through automated testing and CI/CD. Comfortable owning features independently and working across both customer-facing and internal-facing products.

SKILLS

React, TypeScript, JavaScript (ES6+), Node.js, Express, RESTful API Design, HTML5, CSS3, Tailwind CSS, Redis, MySQL, MongoDB, ORM, Google Cloud Platform (Vertex AI), Microsoft Azure, CI/CD (GitHub Actions, Jenkins), Automated Testing (Jest), Git, jQuery, AngularJS, Hack, Haskell, PHP/Kohana

EXPERIENCE

Full-Stack Web Developer | accessiBe, Israel Aug 2024 – Present

- Develop React features on a custom design system built from Figma designs.
- Implement AI-powered features using Google Vertex AI for image recognition.
- Design and build new Node.js/Express API endpoints backed by an ORM data layer.
- Maintain code quality through automated test coverage integrated into CI/CD pipelines.

Software Engineer | Meta (via Qualitest), Israel Oct 2023 – Aug 2024

- Migrated a legacy Haskell codebase to Hack to support large-scale ML model training workflows.
- Performed in-depth code reviews and provided feedback to teammates to raise team-wide code quality.
- Wrote unit tests to catch regressions and prevent system failures ahead of release.
- Investigated and resolved performance and reliability issues in newly shipped features.

Full-Stack Web Developer | Apex Group, Israel Feb 2021 – Oct 2023

- Built responsive, production frontends with React, JavaScript, and Tailwind CSS from design-team specifications.
- Designed and built a Node.js email notification system backed by Azure Blob Storage for handling sensitive investor documents.
- Implemented authentication and access control in React and Node to secure confidential investor document workflows.
- Ensured code quality and reliability via Jest testing and a GitHub Actions CI/CD pipeline.

Full-Stack Web Developer | Hometalk, Israel Jun 2019 – May 2020

- Built UI components in React and REST APIs in PHP/Kohana as part of the Hometalk TV team.
- Migrated legacy AngularJS and PHP pages to React as part of a company-wide modernization effort.
- Fixed critical and non-critical bugs across the codebase, following a Kanban workflow.

Quality Assurance Engineer | Hometalk, Israel May 2018 – Jun 2019

EDUCATION

Israel Tech Challenge — Full-Stack Web Development Bootcamp, 2017 – 2018

Bar Ilan University — B.A. in Communications and Information Science, 2014 – 2017
